

ENVIRONMENTAL PRODUCT DECLARATION

SIRIUS Auxiliary Switch 3RH2911-....

Type II according to ISO 14021 including life cycle impact assessment (LCIA) **siemens.com**

General information

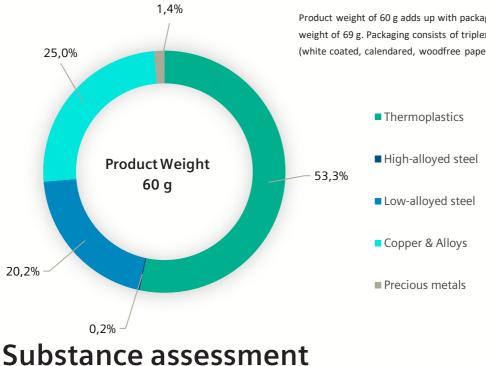

This environmental product declaration (EPD) is based on the international standard ISO 14021 ("Environmental labels and declarations - Self declared environmental claims - Type II"). The data in this EPD has been evaluated on a full-scale life cycle assessment (LCA) study according to ISO 14040/44, taking into account the product category rules (PCR) for electronic and electrotechnical products and systems defined in EN 50693, as well as product specific rules (PSR) for lowvoltage switchgear and controlgear equipment in IEC TS 63058 ED1.0.

Siemens is dedicated to an environmentally conscious design of its products in line with IEC 62430 and has implemented an integrated management system according to ISO 9001, ISO 14001 and ISO 45001.

Product	3RH2911-1HA22 (auxiliary switch)
Representing	All variants in the range of 3RH2911
Product Description	2 NO + 2 NC Current path 1 NC, 1 NC, 1 NO, 1 NO for 3RH and 3RT screw terminal
Functional Unit	To make, carry and break currents of control circuits at rated operation voltages U _e and for the utilization categ according to IEC 60947-5-1 under the operating limits or
	To provide galvanic opening of control circuits.

Material composition

The following chart outlines the overall material composition of the calculated reference product.

At Siemens, we are committed to the development and production of environmentally sound and sustainably produced equipment. This includes avoiding hazardous substances in our products without compromising their benefits for our customers. Please visit the following website to learn more about how we comply with productrelated environmental regulations like RoHS, REACH, WEEE and others: Product Related Environmental Protection

Product weight of 60 g adds up with packaging weight of 9 g to a total weight of 69 g. Packaging consists of triplex cardboard ~8,6 g and Label (white coated, calendared, woodfree paper, FSC certified, ~0,4 g).

Life cycle stages and reference scenarios

	С С	C /
Manufacturing	Operations	End-of-life
This stage covers the extraction of natural resources, production of raw materials, manufac- turing, packaging and transport distances.	This stage covers the product's installation, use and maintenance. Different operating conditions can lead to deviations from the standard scenario.	This stage covers the disassembly, material recycling and thermal treatment of all recyclable materials as well as the disposal of all other materials.
Scenarios		
Energy model used: EU-28: Electricity grid mix	Energy model used: EU-28: Electricity grid mix	Energy model used: EU-28: Electricity grid mix
Transportation model used: 100 km default distance, GLO: Truck-trailer, Euro IV	Use scenario: 0,4 W full load, 20% loading rate of I _n : 6A, 50% service uptime; reference lifetime 20 years	

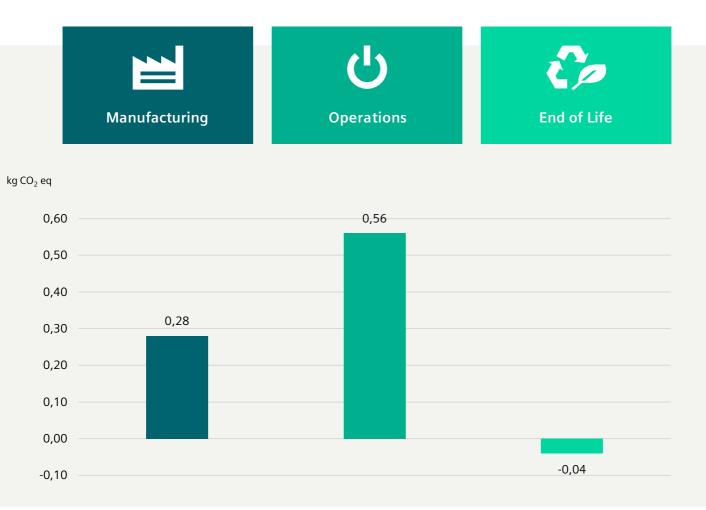

The following impact categories characterize the product's environmental footprint. They have been calculated with

LCIA methodology EF3.0; LCA tool: GaBi 10.6.1.35, Database: GaBi Professional & Extensions, 2020.

Global warming potential

This chart shows the overall global warming potential of the product. The operations phase is the lifecycle phase with the biggest overall impact. Different operating conditions can lead to deviations from the standard scenario.

End-of-life scenario

The end of life stage was modelled by shredding of the device, followed by sorting and material separation process. It leads to

- an overall product recyclability of up to 35% mainly due to high metal content
- an energy recoverability of up to 59% from plastic materials
- a minimum landfill rate of 9%

The exact final values depend on the used recycling process and add up to 100%.

Note: The device should not be disposed of as unsorted municipal waste. Special treatment for specific components may be mandated by law or ecologically sensible. Observe all local and applicable laws.

Legal Disclaimer

This Environmental Product Declaration (EPD) is for information purposes only. It is based upon the standards mentioned above.

This EPD does not warrant or guarantee the composition of a product or that the product will retain a particular composition for a particular period. Therefore, all warranties, representations, conditions, and all other terms of any kind whatsoever implied by statute or common law are - to the fullest extent permitted by applicable law - excluded.

Siemens THEREFORE DOES NOT ASSUME ANY LIABILITY FOR ANY ERROR OR FOR ANY CONSEQUENCE WHICH MAY ARISE FROM THE USE OF THIS INFORMATION TO THE MAXIMUM EXTENT UNDER THE LAW.

Please be aware that the data of this EPD cannot be compared with data calculated based upon product category rules (PCRs) other than the standards mentioned above. The values given are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
